

## DHREM READING SCHEDULE AND ROSH REVIEW STUDY & TEST QUESTIONS

This reading schedule is structured to cover most of The Model of the Clinical Practice of Emergency Medicine (EM Model) over 2 years, which means you should be able to get through the core content of EM twice in 4 years. Because we are letting you choose your primary review textbook, we have left off chapter numbers and titles. Each of the topics should be easy to locate in your text.

Each weekly reading has associated Rosh Review study questions (ranging from 1-44 question per subcategory). We expect you to create your own weekly “tutor-mode” exam for each assigned subcategory. If you click an individual category as you create a new exam, you will see the subcategories listed. You must remember to choose “All” for Question Type. The total number of questions should be the total for the desired subcategory(ies).

You will be assigned 1-2 Rosh exams at the end of each module. The test assignment and due dates are listed on the schedule.
